

PROFILE

Hello, I'm Michael Angelo S. Boco i am currently studying Bachelor of Science in Information Technology at ICCT Colleges. and i hope to pursue a career in this field.

I am hardworking and dedicated student, and i am confident that i have the skills and knowledge necessary to succeed in College.

I am always willing to learn new things and i am eager to face challenges. I am looking forward to learn more about Software Engineering and hope one day be able to make a positive impact in the IT Industry

IT Student

EDUCATION

ICCT Colleges

Currently studying Bachelor of Science in Information Technology

SKILLS

HTML5 & CSS3

I'm quite skilled in using HTML5 and CSS3 because I'm creating a functional website for myself

JavaScript

I know a little on how to use JavaScript because I use this tool in different projects specially at school projects and on my personal websites

PHP & MySQL

I know how to use these both tools but not very professionally, because this is my main tool to use when the website i'm going to make will use a database

Python

This programming language is my favorite tool to use when i'm creating an desktop applications and games etc. so i know how to use this tool but not that very professionally

Java

i know a little on how to use this programming language, i use this programming language on school projects because this programming language is our specific tool to use on school projects
